This page displays a list of existing forums and containers. Containers (optionally) hold forums, and forums hold forum topics (a forum topic is the initial post to a threaded discussion). To provide structure, both containers and forums may be placed inside other containers and forums. To rearrange forums and containers, grab a drag-and-drop handle under the *Name* column and drag the forum or container to a new location in the list. (Grab a handle by clicking and holding the mouse while hovering over a handle icon.) Remember that your changes will not be saved until you click the *Save* button at the bottom of the page.

[Blog entry](#)
A *blog entry* is a single post to an online journal, or *blog*.

[Book page](#)
A *book page* is a page of content, organized into a collection of related entries collectively known as a *book*. A *book page* automatically displays links to adjacent pages, providing a simple navigation system for organizing and reviewing structured content.

[Forum topic](#)
A *forum topic* is the initial post to a new discussion thread within a forum.

[Page](#)
A *page*, similar in form to a *story*, is a simple method for creating and displaying information that rarely changes, such as an "About us" section of a website. By default, a *page* entry does not allow visitor comments and is not featured on the site's initial home page.

[Story](#)
A *story*, similar in form to a *page*, is ideal for creating and displaying content that informs or engages website visitors. Press releases, site announcements, and informal blog-like entries may all be created with a *story* entry. By default, a *story* entry is automatically featured on the site's initial home page, and provides the ability to post comments.
